Veterinary medicine is the branch of medicine that deals with the prevention, control, diagnosis, and treatment of disease, disorder, and injury in animals. Along with this, it also deals with animal rearing, husbandry, breeding, research on nutrition and product development. The scope of veterinary medicine is wide, covering all animal species, both domesticated and wild, with

Wound care in veterinary medicine is an essential part of patient management with great potential to impact the duration and extent of an animal ' s recovery from surgery or traumatic injury. A wound is defined as a break in the continuity of a tissue of the body. 1 A wound occurs when the integrity of any tissue is compromised (see Anatomy Review). Because veterinary technicians are directly ...
